

When sending complex, full arch or esthetic cases to Helm Dental Laboratory, we request you send these types of pictures. These pictures will greatly help us in case planning and creation of the final restoration for your patients. Images may be uploaded through our website or sent via email ([info@HelmDentalLaboratory.com](mailto:info@HelmDentalLaboratory.com)). Images may also be faxed to 972-429-5182.

Please identify the patient by first initial and last name only and the practice / doctor name so that we may attach the images to the correct case.

1. **Full Face/Natural Smile:** Capture from the top of the patient's head to just below the chin. This should be taken with the patient standing, facing directly in front of your camera. Have the patient smile and keep eyes open.

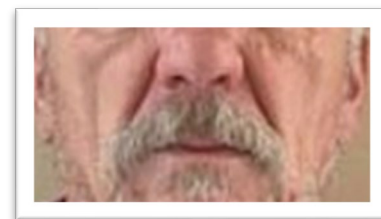

2. **Full Smile, Close-Up:** Capture from just below the nose to below the lower lip. This photo should be taken by having the patient relax their lips and then laugh to get a full smile.

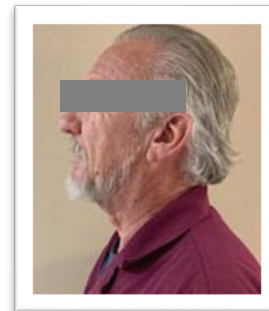

3. **Full Face, Repose:** Capture from the top of the patient's head to just below the chin. This should be taken with the patient standing, facing the camera directly. Have the patient keep eyes open but no smile, relaxed closed lips.

4. **Relaxed Lip, Close-Up:** Capture close-up from just below the nose to below the lower lip. This photo should be taken in the relaxed lip position. You can have the patient say the letter "M" to get this position.

5. **Side Profile:** Capture from the side profile. This photo should show lip support with lips relaxed.

6. **Retracted Lips/ Front, Right Side, Left Side:** Capture close-up from just below the nose to below the lower lip. This photo should include posteriors and as much gingiva as possible. Also make sure this shows the correct position of the midline.
